

JOSHUA YAN

jyan0602@gmail.com | 517-980-0542 | New York, NY

SUMMARY

Engineering leader with 6+ years at Kinetik building NEMT healthcare technology. Promoted to Team Lead in 2023; grew the team from 5 to 10, scaled the platform to 200K+ trips/month, and drove \$12MM+ in ARR.

SKILLS

Languages & Frameworks: JavaScript, Node.js, React • **Cloud:** AWS (Serverless, Lambda, SQS, SNS) • **Data:** MongoDB (Mongoose)

Practices: System design, API-first development (Postman), serverless architecture, mentorship, on-call leadership

EXPERIENCE

Kinetik | Team Lead | New York, NY

Jul 2023 – Present

- **Drove \$12MM+ in ARR** by delivering the cornerstone application that captured Kinetik's strategic NEMT partnerships.
- **Promoted from Software Engineer to lead the team;** grew engineering from 5 to 10, owning hiring, onboarding, and mentorship of junior engineers.
- **Scaled platform to 200K+ trips processed monthly** across hundreds of users serving NEMT insurance providers, brokers, transportation companies, and TNCs.
- **Serve as on-call leader**, owning incident response and production stability across the product suite.
- **Act as engineering point of contact for Product and UI/UX**, translating business requirements into shipped features across all applications.
- **Lead roadmap execution and delivery**, breaking down product initiatives into scoped engineering work, planning sprints, sequencing dependencies, and shipping features end-to-end.

Kinetik | Software Engineer | New York, NY

Oct 2019 – Jul 2023

- **Architected the transition from monolithic backend to AWS serverless**, unlocking growth in trip volume without proportional infrastructure cost.
- **Designed core schemas, databases, and architecture** for the full product suite — patient management, trip scheduling, dispatch, attestation, and claims.
- **Built and shipped API services and partner integrations** by evaluating partner specs and applying custom business logic; spearheaded API-first development with Postman across the team.
- **Implemented frontends across the product suite** in close collaboration with Product and UI/UX teams.

Coleman Research | Client Associate | New York, NY

May 2018 – Feb 2019

- Identified industry trends and qualified experts ahead of client requests, producing 33% of team sales and growing book of business with Tiger Cubs and similar investment firms by 15%+.

EDUCATION

Flatiron School — Software Engineering Immersive

New York, NY

Michigan State University — B.A., Economics (Dean's List)

East Lansing, MI
